

Generating a CSR code using DirectAdmin

To generate the CSR code for a domain name, which is hosted on a server with the DirectAdmin, simply follow steps described below:

- Modify the Access level from 'Admin Level' to 'User Level' in the right hand menu;

- Choose 'SSL Certificate' option from the **Advanced Features**

- Select the option '*Create a Certificate Request*', enter the required information in all fields, and click '*Save*'.

SSL Certificates

☐ Use the server's certificate

☐ Use the server's shared signed certificate.

☒ Create your own self signed certificate [Create A Certificate Request](#)

2 Letter Country Code

State/Province

City

Company

Company Division

Common Name

E-Mail

Key Size (bits)

(!)Important: In accordance with the Comodo (now Sectigo) Certificate Authority policy change, starting from December 20, 2010, SSL Certificates can be issued using CSR codes 2048-bit and higher length.

Example: Country Name (2 letter code): **US** State or Province Name (full name): **California** Locality Name/ City: **Los Angeles** Company: **MyCompany Ltd** Company Division (eg, section): **IT, Support, Sales etc.** Common Name: **yourdomain.com** Email Address: any email address you like (it will not be used for any email delivery)

- Copy the information that appears in the text box. The Certificate Request portion will be used for the Certificate Activation process. If RSA Private key is also available, make sure that you have copied and backed it up because it will not be saved anywhere and will be needed during the installation.

SSL Certificate Request

Here are your SSL Certificate Request. You will send this text to a Certificate Authority and they will give you a Signed Certificate. To use it, paste the Signed Certificate on the next line after "-----END RSA PRIVATE KEY-----" on the previous page and click "Save".
