

How to setup email account in Android Smartphone (Android Lollipop)

How to setup email account in Android Smartphone :-

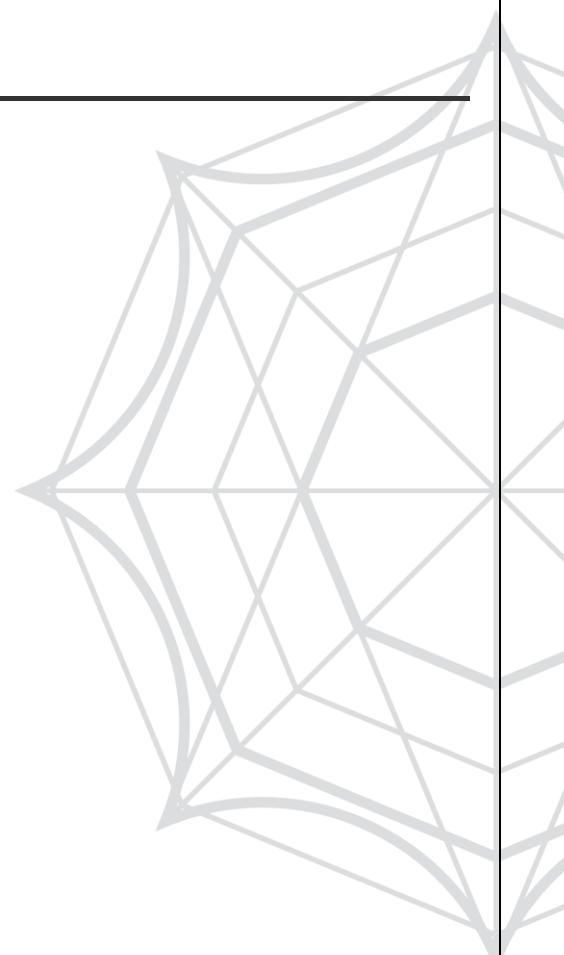

1. Look for email icon/ mail application in your smartphone.

2. After that enter your email account and password, and select "Manual Setup".

A screenshot of the 'Email accounts' setup screen on an Android device. The top bar is blue with the text 'Email accounts'. Below it, a message says 'Select an existing account or add a new one in a few simple steps.' A dropdown menu is open, showing 'Select existing account ▾'. The next section, 'Enter sign-in details', contains a text input field with 'user@domain.com' and a password field with '*****'. A checkbox 'Show password' is checked. At the bottom, there are buttons for 'MANUAL SETUP' and 'NEXT ➞'.

3. The Mail Option will allow you to setup with POP3, IMAP or Microsoft Exchange ActivSync. IMAP is strongly recommended, which allow user to sync & view their emails on multiple devices.
